Ceiling Mounted Evaporator

Frigette's EV2 is a premium-sized evaporator engineered for long service life, ease of installation, low-profile/maximum head clearance, ease of maintenance, broad vehicle coverage, and maximum performance in a competitively sized package. Additionally, the unit is styled to blend with most bus interiors. Consider these advantages:

Long Service Life - Dual motors with extra-long life blower brushes and bearings translate into extended life for low-cost and low maintenance. Premium, high-impact ABS housing and galvanized steel construction for maximum longevity and resistance to abuse.

Ease of Installation - Easy to read instructions, easy cut-to-fit modesty panel, and simple mounting hardware insure error-free, quick installations.

Low Profile/Max Head Room - Slim-line styling and high performance insures comfortable temperatures in tight spaces without sacrificing headroom.

Easy to Maintain - The EV2's washable, return-air filter is extremely accessible and can be reached with the turn of a screwdriver; this contrasts with most filters that are very difficult to retrieve and, consequently, seldom receive proper servicing.

Broad Vehicle Coverage - Universal mounting brackets, ample hardware, and an easily modified modesty panel insure broad vehicle coverage.

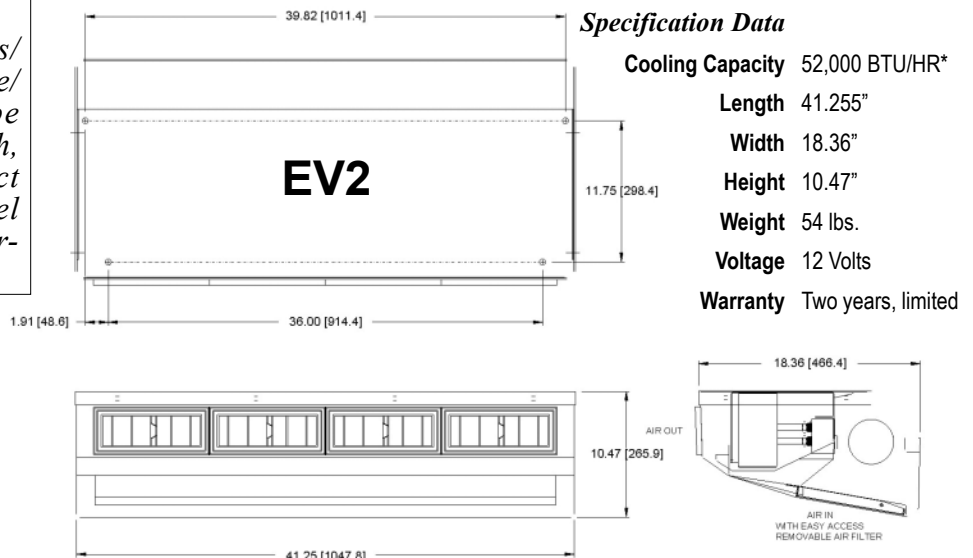

Maximum Performance - Engineered for extreme hot conditions, the EV2's premium combination of compact size and high performance is a welcome addition; likewise, the unit's quiet performance and highly directional air flow will provide wide and evenly distributed coverage.

Attractive Styling - Generously rounded corners, concealed fasteners, colorful logo, and a light beige ABS plastic housing blends with most interior colors (call about other color choices).

EVAPORATOR FEATURES:

Three blower speeds, twin motors/four blowers, four-row copper tube/aluminum fin coil, block-type expansion valve, de-icing switch, low pressure switch, high-impact ABS plastic and galvanized steel construction, o-ring fittings, pressurized condensate drain pan.

Frigette Evaporators can be matched with Frigette's many other components to provide total system coverage. Ask about Frigette's condensers, controls, hoses, fittings, and compressors and many additional items.
